SUMMARY

Backend engineer with **8+ years** architecting high-throughput distributed systems — **2M+ requests/day** on Node.js, TypeScript, NestJS, PostgreSQL and Kafka across Docker/Kubernetes. Integrates AI into real production workflows (21-day onboarding flow cut to **1 day**) and takes products from idea to production, most recently building and launching **Nova AI** solo.

SKILLS

- **Backend:** TypeScript, Node.js, NestJS, Express, Fastify, REST APIs, GraphQL, Microservices
- **Databases:** PostgreSQL, MongoDB, DynamoDB, Redis
- **Cloud & Infrastructure:** AWS (EC2, Lambda, SQS, RDS, SNS), GCP, Docker, Kubernetes, Kafka, CI/CD
- **Architecture:** Distributed Systems, Event-Driven Architecture, API Design, Asynchronous Processing
- **AI:** OpenAI API, Claude, Gemini, LLM Integrations

EXPERIENCE

Senior Backend Engineer

09/2022 – Present

Food Market Hub

Singapore / Remote

- Led the Integration Team building **bi-directional sync with 35+ POS/accounting partners**, powering **1M+ daily API requests**; owned architecture decisions and drove roadmap priorities with product
- Architected distributed Node.js services handling **2M+ requests/day**, decoupling partner syncs into **queue-based async workers** with Redis caching and distributed rate limiting to protect downstream partner APIs
- Built **retry, backoff and idempotency** handling across partner webhooks, preventing duplicate writes and keeping data consistent through partner-side outages
- Reduced latency **30%** and infrastructure cost by **\$500/month** through PostgreSQL index and query-plan optimization plus data model redesign
- Engineered an **AI-powered smart onboarding system** using OpenAI API — cut customer setup time from **21 days to 1 day (95% reduction)**
- Shipped **10+ major features** cross-functionally, improving onboarding and customer satisfaction

Senior Full-Stack Engineer

07/2021 – 08/2022

Geeks Invention Pvt. Ltd.

India / Remote

- Promoted to **Team Lead within one month** for delivering scalable backend architecture; led a team of **8 engineers**
- Designed and deployed a **certificate management platform** with secure API-based issuance and tracking
- Scaled EdTech platform infrastructure to process **10M+ daily messages** via Kafka, improving real-time engagement and gamification
- Built **Leaderboard and Level-Up modules**, increasing student task completion rates by **20%** across a large active user base

Software Developer

12/2017 – 06/2021

La Net Team Software Solutions Pvt. Ltd.

Surat, India

- Joined as one of the initial developers (50+ customers); scaled Marketing CRM to support **300K+ active customers** using microservices, Docker & Kubernetes
- Delivered **real-time analytics, campaign management**, and multi-channel integrations (Twilio, Gmail, Facebook APIs)
- Built and managed APIs for a **doctor appointment booking mobile app**, enabling real-time scheduling

SIDE PROJECTS

Nova AI — joinnova.ai

AI-powered LinkedIn outreach and lead-generation SaaS | Solo-built

- Designed, built, and shipped the entire product **solo** — system architecture, backend services, AI integrations, automation infrastructure, and deployment
- Architected **AI-driven lead scoring** and personalized outreach workflows from intent signals and LLMs, with human approval before message delivery
- Engineered a real-time **activity governor** enforcing account-level rate limits from timezone and location/IP signals, supporting multi-account asynchronous scheduling and reliable production execution

YourDateAI (Web + Mobile App)

- Built with **OpenAI API, Capacitor, Node.js, and Supabase**; deployed to the Play Store and live at yourdateai.com
- Launched an interactive AI-powered dating assistant with **100+ downloads** in the first month

EDUCATION

Master of Computer Applications

Uka Tarsadia University

06/2016 – 06/2018

Bachelor of Computer Applications

Veer Narmad South Gujarat University

06/2013 – 06/2016
