SUMMARY

Senior Backend Engineer with 7+ years of experience scaling high-throughput systems from thousands to millions of daily requests. Expert in Node.js, TypeScript, NestJS, and cloud-native infrastructure (Docker, Kubernetes, PostgreSQL). Proven track record of optimizing performance, reducing operational costs, and integrating Gen-AI to drive **95%+ efficiency gains** in critical workflows.

WORK EXPERIENCE

Senior Backend Engineer

Food Market Hub

09/2022 – Present Singapore / Remote

A platform providing backend solutions for food market operations

- Led Integration Team, enabling **bidirectional sync with 35+ POS/accounting partners**, powering **1M+ daily API requests** and expanding product adoption
- Engineered an **AI-powered smart onboarding system** using OpenAI API — cut customer setup time from **21 days to 1 day (95% reduction)**
- Architected and managed **high-throughput backend services** handling **2M+ requests/day** with sustained reliability
- Optimized PostgreSQL queries and backend logic, reducing latency by **30%** and saving **\$500/month** in infrastructure costs
- Partnered across Product, QA, and Frontend teams to ship **10+ major features**, improving user onboarding and satisfaction

Senior Full-Stack Engineer

Geeks Invention Pvt. Ltd.

07/2021 – 08/2022 India / Remote

A company specializing in innovative technology solutions for various sectors

- Promoted to **Team Lead within one month** for delivering scalable backend architecture; led a team of **8 engineers**
- Designed and deployed a **certificate management platform** with secure API based issuance and tracking
- Scaled EdTech platform infrastructure to process **10M+ daily messages** via Kafka, improving real-time engagement and gamification
- Built **Leaderboard and Level-Up modules**, increasing student task completion rates by **20%** across a large active user base

Software Developer

La Net Team Software Solutions Pvt. Ltd.

12/2017 – 06/2021 Surat, India

A software solutions company focusing on custom solutions for business needs

- Joined as one of the initial developers (50+ customers); scaled Marketing CRM to support **300K+ active customers** using microservices, Docker & Kubernetes
- Delivered **real-time analytics, campaign management**, and multichannel integrations (Twilio, Gmail, Facebook APIs)
- Built and managed APIs for a **doctor appointment booking mobile app**, enabling real-time scheduling

EDUCATION

Master of Computer Applications

Uka Tarsadia University

06/2016 – 06/2018

Bachelor of Computer Applications

Veer Narmad South Gujarat University

06/2013 – 06/2016

KEY ACHIEVEMENTS

- **Scaling Backend Systems**

Led backend architecture at Food Market Hub, scaling systems to handle **1M+ daily requests** with bidirectional data sync across 35+ partners
- **AI-Powered Onboarding**

Engineered an AI-powered onboarding flow using OpenAI API, reducing manual onboarding time by **95% (21 days → 1 day)**
- **PostgreSQL Optimization**

Optimized PostgreSQL performance and microservices latency by **30%**, saving **\$500/month** in infrastructure costs
- **EdTech Platform Management**

Managed backend for EdTech platform, scaling infrastructure to process **10M+ message requests daily** via Kafka

SKILLS

Node.js
